PROFESSIONAL PROFILE

Cybersecurity Analyst with a strong background in Systems Analysis and hands-on experience in roles such as Systems Architect and SOC Analyst. Reliable and results-driven professional with proven decision-making and team leadership skills. Actively seeking international opportunities in dynamic environments to expand knowledge and contribute to impactful projects. Available for relocation and open to hybrid or on-site in other countries.

EDUCATION

CYBERSECURITY ON LINE

Ethical hacker Practical
2024 - 2024

IES ANTONIO SEQUEROS

Course Specialization Cybersecurity
2024 - 2025

IES SEVERO OCHOA

*Advanced Vocational Training in Network Systems
Administration (CFGS ASIR)*
2021 - 2023

EXPERTISE

Cybersecurity Operations

Network Security & Firewall

Infrastructure Management

Response & Troubleshooting

Virtualization & Cloud Environments

Monitoring & IT Service Management

EMPLOYMENT HISTORY

Gestión Tributaria Territorial | System Administrator

2024 - *At the moment*

Responsibilities:

- Provided technical support for critical systems and servers, resolving incidents efficiently and ensuring business continuity.
- Coordinated with cross-functional technical teams to accelerate issue resolution and minimize service disruptions.
- Conducted continuous infrastructure monitoring using Nagios, enabling early detection of performance degradation and system failures.
- Responded to and investigated real-time alerts from the Security Operations Center (SOC), contributing to threat identification and mitigation.
- Performed proactive system reviews to anticipate future issues, reducing unplanned downtime and improving overall stability.
- Escalated and documented key technical events for further analysis and continuous improvement of IT operations.

Clave Informática | Systems Administrator

2023 - 2024

Responsibilities:

- Supervised IT infrastructure and network topology across multiple locations, ensuring high availability and compliance with defined SLAs.
- Managed Hyper-V environments and performed proactive monitoring and incident resolution, improving system uptime and response times.
- Led the administration of internal firewalls and enforced cybersecurity protocols, strengthening internal security posture.
- Optimised departmental budgets through effective vendor negotiations, achieving cost reductions without compromising service quality.
- Contributed to Azure-based infrastructure projects, enhancing cloud integration and scalability.
- Implemented SIEM solutions to improve threat detection and system

SKILLS

TRAITS

- ANALYTICAL THINKER
- PROBLEM SOLVER
- ADAPTABLE
- DETAIL-ORIENTED
- CONTINUOUS LEARNER

EMPLOYMENT HISTORY (CONTINUED)

Tecnofix | Electronic Technician
2021 – 2022

Responsibilities:

- Delivered timely and effective repairs of electronic devices, significantly reducing equipment downtime and improving operational continuity.
- Installed and configured operating systems across multiple platforms, streamlining system setup and reducing onboarding time for new devices.
- Diagnosed and resolved recurring hardware and software malfunctions, contributing to a measurable increase in device stability and user satisfaction.
- Improved internal troubleshooting procedures by documenting technical resolutions, which enhanced team efficiency and reduced repeat issues.
- Supported cross-functional technical initiatives by collaborating with IT and support teams, ensuring consistent standards and service quality.

Achievements

- Led the creation of an automation tool for deploying company-mandated software, improving setup efficiency and reducing manual workload. (GTT)
- Negotiated vendor contracts, resulting in a 50% reduction in departmental IT costs without affecting service quality. (Clavei)
- Led the audit of all company devices and enforced security policies to achieve compliance with the Spanish National Security Framework (ENS certification). (Clavei)
